

©-gel^{0₂™} Resus Pack

Four things in one pack, one less thing to think about

Airway Management • Airway Devices

Quality, innovation and choice

In emergency medicine, you need equipment that's easy, rapid and reliable to use. The i-gel O_2 Resus Pack contains everything you need to prepare, insert and secure the i-gel O_2 quickly and efficiently: an i-gel O_2 supraglottic airway, a sachet of lubricant, airway support strap and a suction tube.

The i-gel O_2 incorporates a supplementary oxygen port and an integral hook ring for securing of the airway support strap. The i-gel O_2 has been designed to facilitate ventilation as part of standard resuscitation protocols, such as those designated by the European Resuscitation Council (ERC) and the American Heart Association (AHA). However, the i-gel O_2 incorporates a supplementary oxygen port, so can also be used for the delivery of passive oxygenation, or Passive Airway Management (PAMTM), as part of an appropriate CardioCerebral Resuscitation (CCR) protocol.

Airway innovation since 2007

i-gel is the innovative second generation supraglottic airway device from Intersurgical launched in 2007. The first major development since the laryngeal mask airway, the i-gel changed the face of airway management and is now widely used in anaesthesia and resuscitation around the world.

The non-inflatable cuff

The i-gel gets its name from the innovative soft, gel-like material from which it is made. It is the innovative application of this material that has enabled the development of a unique non-inflatable cuff. This means there is

no need for cuff deflation prior to insertion and no cuff inflation after placement to secure a seal, shortening and simplifying the preparation and insertion procedure.

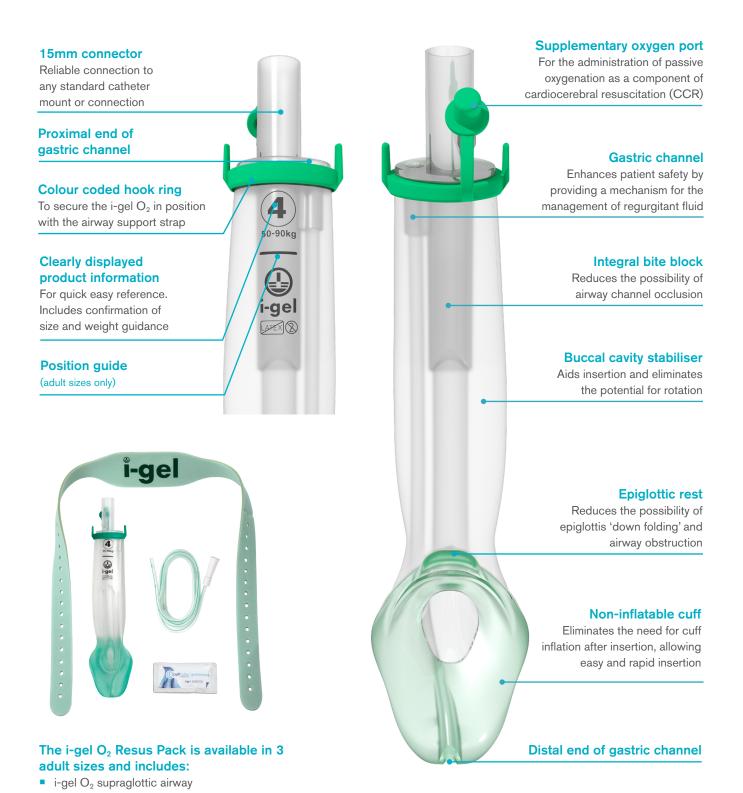

Insertion

The i-gel O_2 is incredibly easy to use. Insertion is rapid and can normally be achieved in less than 5 seconds. The simplicity of i-gel O_2 means the insertion technique is instinctive, reliable and does not require or benefit from the insertion of fingers or thumbs into the patient's mouth.

Fixation

The i-gel O_2 Resus Pack includes a specially designed airway support strap for securing the i-gel O_2 in position. Fixation is easily achieved by sliding the strap under the patient's neck and securing it in place to the hook ring on the collar of the i-gel O_2 . This makes it ideal for use where adhesive tape is unsuitable, such as on patients with facial hair.

i-gel O₂ Resus Pack

- Sachet of lubricant for quick and easy lubrication of the i-gel O₂ prior to insertion
- Airway support strap to secure the i-gel O₂ in position
- 12 FG suction tube for insertion through the gastric channel to empty fluid from the stomach.

Ordering information

The i-gel O_2 Resus Pack contains an i-gel O_2 , a sachet of lubricant, airway support strap and suction tube, all packaged in a specially designed clear, sterile, rigid pack. This unique design ensures protection of the contents, both in transit and in storage. The i-gel O_2 has a colour coded hook ring to allow quick and easy identification of size. The i-gel O_2 Resus Pack is available in three adult sizes.

	Code	Description	Weight	Box Qty.	
•	8705000	i-gel O ₂ Resus Pack, large adult – includes a size 5 i-gel O ₂ with orange hook ring, sachet of lubricant, airway support strap and a 12FG suction tube	90+kg	6	8
	8704000	i-gel O_2 Resus Pack, medium adult – includes a size 4 i-gel O_2 with green hook ring, sachet of lubricant, airway support strap and a 12FG suction tube	50–90kg	6	8
•	8703000	i-gel O_2 Resus Pack, small adult – includes a size 3 i-gel O_2 with yellow hook ring, sachet of lubricant, airway support strap and a 12FG suction tube	30–60kg	6	S
